EXPERIENCE

Python Developer - Automation & Web Scraping

Freelance, Self-Employed

- 📅 01/2024 - Present 📍 Ahmedabad, India
- Designed and delivered Python-based automation solutions that eliminated 20+ hours of manual work per week, improving operational efficiency and reducing repetitive tasks
 - Built end-to-end web scraping and data extraction pipelines using Python to collect, clean, transform, and structure data for business intelligence and analytics
 - Developed interactive KPI dashboards consolidating data from multiple sources, providing management with faster, more actionable business insights
 - Integrated third-party REST APIs into centralized automation platforms and architected full-stack applications on AWS supporting high levels of concurrent users
 - Implemented ETL workflows and CI/CD pipelines to automate data collection, testing, build, and deployment for Python-based services
 - Used Git/GitHub and Agile practices across iterative development, debugging, testing, and continuous improvement

Full-Stack Developer - React.js & Python

Freelance, Self-Employed

- 📅 01/2024 - 2026 📍 Ahmedabad, India
- Engineered and delivered 5+ production-ready, responsive web applications using React.js, JavaScript, HTML5, and CSS3, achieving 98% cross-browser compatibility
 - Developed reusable React.js component architectures using modern Hooks and state-management patterns, improving maintainability and reducing duplicate code
 - Integrated RESTful APIs with dynamic front-end applications to deliver real-time data and interactive workflows, contributing to a 40% increase in user engagement
 - Designed and deployed a scalable web platform supporting 10,000+ concurrent users, with emphasis on performance, reliability, and scalability
 - Profiled and optimized JavaScript execution and front-end performance using Chrome DevTools, and applied mobile-first, cross-device design principles
 - Managed projects end-to-end - planning, architecture, development, CI/CD deployment, and ongoing maintenance - using Git/GitHub and Agile code review practices

Trainee Engineer - Web Design

Invision Software Solution

- 📅 09/2022 📍 Gandhinagar, India
- Completed an internship as a Trainee Engineer in Web Design, gaining hands-on exposure to web development and design workflows
 - Gained foundational exposure to HTML/CSS, Microsoft .NET, PHP, Java, and Python
 - Demonstrated strong problem-solving, initiative, teamwork, and communication skills on assigned tasks

EDUCATION

Bachelor of Technology, Computer Engineering

Gujarat Technological University

Secondary School Certificate (SSC)

Gurushree Dharmadasji Maharaj Madhav Vidyalay

📅 06/2019 - 05/2021

SUMMARY

Full-stack developer and Python automation engineer with 2+ years of experience building production web applications and automation pipelines for startups. Skilled in React.js, Node.js, MongoDB, RESTful API integration, and AWS cloud deployment, with a specialization in Python-based web scraping and workflow automation using BeautifulSoup and Selenium. Proven track record architecting scalable platforms supporting 10,000+ concurrent users, delivering automation systems that eliminate 20+ hours of manual work per week, and integrating APIs that increased user engagement by 40%.

KEY ACHIEVEMENTS

- 💎

Efficiency Automation
Decreased manual work by automating 20+ hours weekly, increasing efficiency by 30%.
- 💎

User Engagement Increase
Boosted user engagement 40% by integrating dynamic APIs into front-end applications.
- 💎

Cross-Browser Compatibility
Engineered web applications achieving 98% cross-browser compatibility, enhancing user experience.
- 💎

Scalable Platform Development
Supported 10,000+ concurrent users on scalable AWS platform, ensuring reliability and performance.

SKILLS

React.js	Node.js	MongoDB	JavaScript
HTML5	CSS3	Python	Web Scraping
BeautifulSoup	Selenium		
RESTful API Integration			
AWS Cloud Deployment		CI/CD Pipelines	
Git	GitHub	Agile Development	
ETL Workflows		KPI Dashboards	
Cross-Browser Compatibility			
Responsive & Mobile-First Design
